**Heart of the Sea**

**Sunday, September 12<sup>th</sup> at**

**Tybee Island Marine Science Center**

**A special day of children's programs -**

**10 a.m. - 5 p.m.**

### **About This Festival**

The goal of the Savannah Ocean Film Festival is to educate, inspire, entertain and foster a spirit of ocean stewardship through the screening of films that explore our relationship with the sea.

Film and video have been the most powerful force in revealing the complexity and beauty of our underwater world. From the pioneering images of Jacques Cousteau to today's IMAX and digital imagery, our generation can explore the ocean frontier as never before. NOAA's Gray's Reef National Marine Sanctuary is bringing this festival of ocean films to Savannah to celebrate marine conservation worldwide and to encourage commitment to sustaining healthy oceans and coasts.

### **About The Savannah College of Art and Design and the Trustees Theater**

The Savannah College of Art and Design's historic Trustees Theater provides a multi-purpose facility for the emerging media and performing arts department, the Savannah Film Festival, the annual spring fashion show as well as a venue for screening student films, videos and computer animations. The theater hosts a variety of performances, concerts and lectures for the college and community. By restoring the 1,100 seat theater to its former Art Moderne splendor, and by attracting major performers, the college has contributed to the revival of the Savannah theater district.

### **Thanks**

The Savannah Ocean Film Festival would not be possible without the help of the National Marine Sanctuary Program; the National Marine Sanctuary Foundation; the Savannah SCUBA Club; the Savannah College of Art and Design, especially the hard-working staff of Trustees Theater; Michael Jordan; WSAV; Savannah Morning News; the Gray's Reef Student Ocean Council and many, many others.

## Features

### Proteus

- An animated documentary exploring the 19th century's engagement with the undersea world through science, technology, painting, poetry and myth. Premiered at 2004 Sundance Film Festival, Best Documentary Award 2004 Philadelphia Film Festival, Santa Cruz Film Festival. Director: David Lebrun. Run Time: 57 min.

### Oceanmen - Extreme Dive

- The story of two men and their attempt to dive deeper than anyone has ever dared—more than 500 feet on a single breath. Southeast regional premier. Director / Cinematographer: Bob Talbot. Run Time: 40 min.

### Dolphins & Orcas

- A beautiful look at everyone favorite marine mammals set to music. Director / Cinematographer: Bob Talbot. Run Time: 8 min.

### Keiko: Born to be Wild

- Keiko, the whale star of "Free Willie" fame had not seen freedom since he was two years old. This is the story of what happened after millions of fans demanded his freedom. First U.S. screening. Executive Producer: Jean-Michel Cousteau. Run Time: 53 min.

### Keiko: The Gate to Freedom

- Famed ocean explorer Jean-Michel Cousteau takes on the challenge of joining with other scientists and experts to find out what it will take to finally save Keiko and return him to the wild. First U.S. screening. Executive Producer: Jean-Michel Cousteau. Run Time: 53 min.

### Heart of the Sea

- A moving portrait of Hawaiian surf legend Rell Sun, a pioneer of women's professional surfing. Even after being diagnosed with breast cancer, Rell continued to inspire all with her commitment to community and the ocean environment. Director: Lisa Denker. Run Time: 57 min.

## Ocean Videos

### Dive Into Our National Marine Sanctuaries

- An introduction to the system of National Marine Sanctuaries which protect special marine environments like Gray's Reef.

### Gray's Reef: Real & Imagined

- Coastal Georgia is home to one of America's ocean treasures - Gray's Reef National Marine Sanctuary.

### Rivers to Reefs

- The land and the sea are connected-what happens in Atlanta impacts the Altamaha and, eventually, the open ocean environment including Gray's Reef National Marine Sanctuary

### Sapelo: An Island in Time

- Visit the Sapelo Island National Estuarine Research Reserve.

### Empty Oceans, Empty Nets

- Explores the immense changes facing marine fisheries around the world.

### Marine Protected Areas

- How these specially protected area of the ocean may be among the answers to today's concerns about fishing

### Making Waves

- A look at the role women are now playing in the salmon fishing industry at Bristol Bay, Alaska.

### Tragedies in the Mist

- The Great Lakes has a long history of maritime transportation; now a National Marine Sanctuary protects the site of more than 200 shipwrecks.

### Titanic in a Tub

- Explore the history and development of the great sailing ships and the beautifully detailed models they inspired.
